## 1. PROJECT INFORMATION

### 1.1 Background

The Inner-City regeneration programme has been underpinned by the Inner-City Regeneration Charter since 2007. In July 2013 the City of Johannesburg launched the Inner-City Transformation Roadmap, which is the framework that will guide further development of the inner city in the medium term. It is a framework that recognises the central role of the inner city as an entry point and a place of opportunity for many, including the poor. The inner city continues to be a meeting point for diverse cultures, as scores of individuals aspire to create a livelihood and find a foothold in the heart of Johannesburg.

The City's stated intention is to deliver, extend and maintain services that are sustainable in the long term; to provide the social support and facilities that promote inclusivity and diversity; and to encourage productivity and the economic endeavours of large and small business. This can only be achieved with good governance and strategic planning and budgeting. It can only be sustained with dedicated effort to maintain and repair the infrastructure that is the backbone of the built environment. And it is best achieved within neighbourhoods – a planning and implementation system that is focused on delivery and maintenance at the local scale. This area-based focus is essential if we are to tackle issues in the inner city in a holistic way.

Inner City 2012

Inner city 2040

The roadmap is the framework through which the City and multiple stakeholders can collectively pursue the vision of the inner city as A place of opportunity: a well-governed, transformed, safe, clean and sustainable inner city of Johannesburg, which offers high quality, sustainable services; supports vibrant economic activity; and provides a

welcoming place for all residents, migrants, commuters, workers, traders, investors and tourists.

## 1.2 Project Purpose

The upgrading of the Inner-City Ranks is intended to fulfil the broader regeneration objectives including to address the relevant Johannesburg Growth and Development Strategy outcomes, which aims to promote the following:

- Economic growth;
- Environmental quality;
- Accessibility and connectivity;
- Livability (create a vibrant public realm with high quality public space);
- Social cohesion and inclusivity; and
- Public transport orientated development and intermodal integration.

## 1.3 Project Location and Description

The refurbishment of ranks will be for all the Inner City Local and Long-Distance Bus Holding, including cross boarder commuting. There are numerous ranks identified as a start for implementation. For purposes of this RFQ, Fleet Africa Cross Border Bussing (cnr Henry Nxumalo and Albertina Sisulu Str) is the study area.

## 8. RISK TOLERANCE FRAMEWORK

The JDA has adopted a Risk Tolerance Framework (RTF) which directs the JDA to consider its risk exposure to contractors/Service Providers in terms of the number of contracts awarded to a single Contractor/service provider or the total value of contracts awarded to a single Contractor/service provider in a particular year.

In terms of the Risk Tolerance Framework, the JDA determine the risk exposure as excessive in instances where the value of the contracts for individual **Professional Service providers e.g. Project manager, Engineers, Quantity Surveyor and Consultants**) is either:

1. The greater of **R8 million** or four contracts/ projects in the current financial year or
2. The greater of **R12 million** or six contracts/projects over two financial years (current year and previous financial year).

And

For **multi-disciplinary professional teams** in instances where the value of the contracts awarded is (e.g. more than one discipline being provided by the same bidder) is either:

1. The greater of **R12 million** or six contracts/ projects in the current financial year or
2. The greater of **R20 million** or nine contracts/projects over two financial years (current year and previous financial year)

A risk analysis shall be undertaken on the bidder with the highest number of points obtained, to determine whether the tenderer does not exceed the JDA's risk framework criteria as stated above, in other words whether it falls within the ambit of the Risk Tolerance Framework as acceptable. JDA reserves the right to award a contract to a bidder who has exceeded the threshold as stated above.
