10. RISK TOLERANCE

The JDA has adopted a Risk Tolerance Framework (RTF) which enjoins the JDA to consider its risk exposure to contractors / service providers in terms of the number of contracts awarded to a single contractor / service provider in a particular year.

In terms of the Risk Tolerance Framework, the JDA determines the risk exposure as excessive in instances where the value of the contracts for individual professional service providers (e.g. project managers / engineers / quantity surveyors / consultants) is either:

The greater of R8 million or four contracts / projects in the current financial year or

The greater of R12 million or six contracts / projects over two financial years (current year and previous financial year)

And in instances where the value of contracts for multi-disciplinary professional service providers (e.g. more than one discipline / service is provided by the same bidder) is either:

The greater of R12 million or six contracts / projects in the current financial year or

The greater of R20 million or nine contracts / projects over two financial years (current year and previous financial year)

A risk analysis shall be undertaken on the bidder with the highest number of points obtained, to determine whether the tenderer does not exceed the JDA's risk framework criteria as stated above. In other words, whether it falls within the ambit of the Risk Tolerance Framework as acceptable.

Over and above the number of projects and values, bidders will be further evaluated on commercial risks which will include but not limited to the following: poor performance on previous projects, available resources for the projects, unduly high or unduly low tendered offers, significant arithmetical errors and omissions in the pricing table.

The above may impact the outcome of the evaluation.

JDA reserves the right to award a contract to a bidder who has exceeded the threshold as stated above.

Shortlisted bidders may be requested to attend interviews should there be a need for clarity
