## 1. Overview

Sectional title was introduced in South Africa in 1971. In terms of the model, there is a separation of ownership in land and in buildings. Sectional title owners have full ownership of their flat or unit and everything else is communal property. The Communal Property is owned and maintained by a Body Corporate which is a legal entity to be constituted thereafter in terms of the Section 21 Companies Act. The Body Corporate elects trustees to exercise the powers vested in the Bodies Corporate. In most cases, trustees appoint a managing agent to assist them with managing the sectional title scheme.

In order for the Body Corporate to manage common areas effectively, sectional title owners are required to pay levies. These levies cover costs of ongoing management by the managing agent, regular maintenance, incidental repairs (such as broken lifts), services charges and rates that are payable to the Local Council. A Body Corporate determines the setting of levies and their annual increases. This poses a particular problem, especially in the low to moderate income sectional titles market, because it is in the owners' interest to keep levies to a minimum. Consequently, most Body Corporates operate on a shoe-string budget, and this has a significant impact on the quality of management and maintenance that is achieved. The dependency of the model on the success of the Body Corporate (and its ability to act beyond the self-interest of its individual members) has been its key shortcoming, in high, medium and low-income arrangements. Specific problems include failure to set appropriate levies and to pay rates and service charges.

In 2006 there was a Sectional Title Pilot Project which undertook detailed research into five buildings in the Inner City commissioned by the City of Johannesburg. The research concluded that Inner City sectional title buildings are dysfunctional because of ineffective Bodies Corporate. Any effort to rehabilitate Sectional Title buildings must first address the weakness of their management structures in a way that resolves problems and applies real and effective sanction against non-performance. Second, the municipality must take on the responsibility of engaging effectively with the Bodies Corporate in respect of accurate and timeous billing and effective collection.

Dysfunctional Sectional Title Properties in the Inner City have the following negative consequences:

- Poor living environments for residents- no water, electricity, refuse services, extensive overcrowding, potential fire hazard
- Impact on Inner City Neighbourhoods to have dysfunctional buildings- difficult to attract investment in other properties
- Crime- ridden buildings
- Urban management challenges- impact on bulk services in area- water, sewerage, stormwater and electrical concerns
- Fiscal loss for the City due to non-payment of administered costs
- Negative impact on property value both on the subject erf and those adjacent to it.
- Prevents 'ownership' in the Inner City as well as depriving home buyers opportunities to move up the housing ladder in a post rental market.

As such the JDA has partnered with BASA, TUHF, ABSA, Nedbank, Standard Bank and FNB to run a Sectional Title programme for the Inner City of Johannesburg. As part of the Sectional Title Pilot, structural assessments will be required on 5 identified buildings, as per the scope below.

## 2. Location

The focus of the Sectional Title Pilot Study is in Berea in the Inner City of Johannesburg. This medium density residential neighbourhood has a variety of Sectional Title buildings, which are dysfunctional. The project team will identify and make formal agreements with the residents of the 5 buildings to be assessed.

## 3. Duration

The estimated period of the project is to conclude on 30 June 2020. It is expected that the actual structural assessments will only require 1 month of the service providers time including, site visits and report writing.

## 4. Professional Team

The JDA is requesting proposals from experienced companies, consortiums and joint ventures to render the Engineering (Consortium of Engineers with Civil and Structural Engineers being lead consultants) services required for the condition assessment of the Sectional Title Rehabilitation Pilot in the 2019/20 financial year.

The Engineering (Civil, Structural, Electrical, Mechanical and Fire) services must be provided as a consortium or joint venture with all services found within the same company.

### 8.3 Price and Empowerment

Having completed a technical evaluation, the procedure for the evaluation of technically qualifying tenders is Method 2 (Price and Preferences). The Preference Point System assigns a score to each tenderer based on the tender price and on the tenderer's BBBEE status. These scores are combined to determine an overall score for the tender. The tender with the highest score will be considered for acceptance.

The Preference Point System will be applied as follows:

- For tenders below R50 million
  - 80 points are assigned to price
  - Up to 20 points are assigned to BBBEE status per the table under item 7.3.1
- Points scored will be rounded off to the nearest 2 decimal places

### 8.3.1 Points awarded for BBBEE status level

Points will be awarded for empowerment (BBBEE), in accordance with the Preferential Procurement Regulations 2017 published in Government Gazette No. 40553 dated 20 January 2017. The table overleaf is applicable in this regard:

B-BBEE Status Level Of Contributor	Number of Points
	Tenders above R50 million
1	20
2	18
3	14
4	12
5	8
6	6
7	4
8	2
<b>Non-Compliant contributor</b>	<b>0</b>

- 8.3.1.2 Tenderers must submit their original and valid B-BBEE status level verification certificate substantiating their B-BBEE rating. ### 8.3.2 Formula for scoring tender price

The following formula will be used to calculate the points for price.

$$P_s = X \left[ 1 - \frac{(P_t - P_{min})}{P_{min}} \right]$$

Where

$P_s$  = Points scored for comparative price of tender under consideration

$P_t$  = Comparative price of tender under consideration

$P_{min}$  = Comparative price of lowest acceptable tender

$X$  = **Points** assigned to price

### 6.3.3 The total preference points for a tender are calculated with the formula

$PP = P_s + P_{bee}$  Where

$PP$  is the total number of preference points scored by the tenderer

$P_s$  is the points scored for the comparative price of the tenderer, and

$P_{bee}$  is the number of points awarded to the tenderer based on his certified B-BBEE status level.
